## Oplemenjena iverica

Oplemenjena iverica je iverica presvučena dekorativnim papirima koji su prethodno impregnirani melaminskim smolama. Proces oplemenjivanja obavlja se pod visokim tlakom i temperaturom, te se u tom procesu formira struktura na dekorima. Površina ploča može biti mat ili polumat pa sve do visokog sjaja, a između njih se nalazi čitav niz posebnih površinskih tekstura koje daju dojam različitih materijala, od kamena, keramike, betona, metala pa sve do finih drvnih površina kod kojih struktura pora odgovara prikazanom drvnom dekoru. Oplemenjena iverica kao materijal vrlo je rasprostranjena i relativno jednostavna za primjenu u područjima izrade namještaja, opremanja i uređenja interijera.
