Visoki sjaj i Acryl visoki sjaj

Sjajni materijali u raznim bojama daju neograničene opcije kod dizajna interijera. Oplemenjeni MDF dolazi u izvedbi jednostanog ili obostranog sjaja. Ploče su obložene prozirnom zaštitnom folijom koja se sa proizvoda skida tek nakon obrade i montaže. Acryl visokog sjaja nanesenog na MDF ploče doista ima odlike najvišeg sjaja gdje se doslovno sve oslikava na površini ploče. Acryl ploče visokog sjaja se standardno obrađuju, pile i kantiraju bez ikakvih posebnih postupaka.
